Vision & Mission

Vision: safe and smooth transport for all...

Mission:

Develop and manage integrated and sustainable world-class Roads and Transportation Systems, provide pioneering services to all stakeholders, and support Dubai's vision through shaping the future, preparing policies and legislations, adopting technologies and innovations, and implementing world-class practices and standards.

Challenges

- Availability of accurate information for asset's Registration upon project's handing over
- Tracking the changes of project's design & execution
- Readiness of asset's information for operation & maintenance activities
- Tracking the history of building/ generating Assets
- Availability of Warranty & certification information
- The need for integration between different asset's life-cycle stages

Approach

- RTA decided to become a fully data driven asset owner, as a pioneer world wide in digitizing its assets.
- RTA has established a clear and comprehensive road map to implement such big change.
- RTA recognized that the implementation of BIM should cover the entire life cycle and with strong partnership with its stakeholders and supply chain.

8 UAE Federal Mandates

9 Dubai Government Mandates

Focusing on delivering six strategic digital pillars....

Asset Management & BIM

➤ ISO 55000 definition for Asset Management:

“A **coordinated activity** of an organization to realize value from assets”. In turn, Asset is an item, thing or entity that has potential or actual value to an organization”

➤ BIM Building Information Modelling (BIM)

“**Coordinated set of processes**, supported by technology, that adds value by creating, managing, and sharing the properties of an asset during its lifecycle

Launching & Managing the BIM Center

- ❑ An interactive environment that allows 30 people to work on the same model at the same time, equipped with all necessary advanced technologies and controls.
- ❑ Provides a collaborative coordinated environment for optimum decision making throughout the life-cycle of the assets.
- ❑ State of Art training center for BIM advancement knowledge.

Route 2020 – BIM Supports better Communication & Decision Making

Internal & External Visualization:

- Enhance Understanding & Support Decision Making
- Internal & External Stakeholder Engagement
- Increase Certainty & Improve Communication
- Assist with Planning Applications

Route 2020 – BIM supports Sustainability Analysis

BIM data generated during design & build enables:

***Faster, Safer, Less wasteful** construction, **More Cost-Effective, Sustainable operation**, better maintenance & eventual decommissioning*

BIM Enables...

- ❑ Measure & compare embodied & **operational carbon** associated with different options
- ❑ **Offsite fabrication** of common components eliminates **over-ordering**, **reduces waste** & **allows offcut materials** to be **reused or recycled**
- ❑ Using coordinated model for **fabrication** means **effective fit** on site

Route 2020 – BIM supports Sustainability Analysis

Energy Analysis:

- Improve Design Outcome
- Reduce Running Cost
- Improve Building Performance
- Sustainability results information inside the BIM models
