# Principles are applicable to organisations big and small, public and private

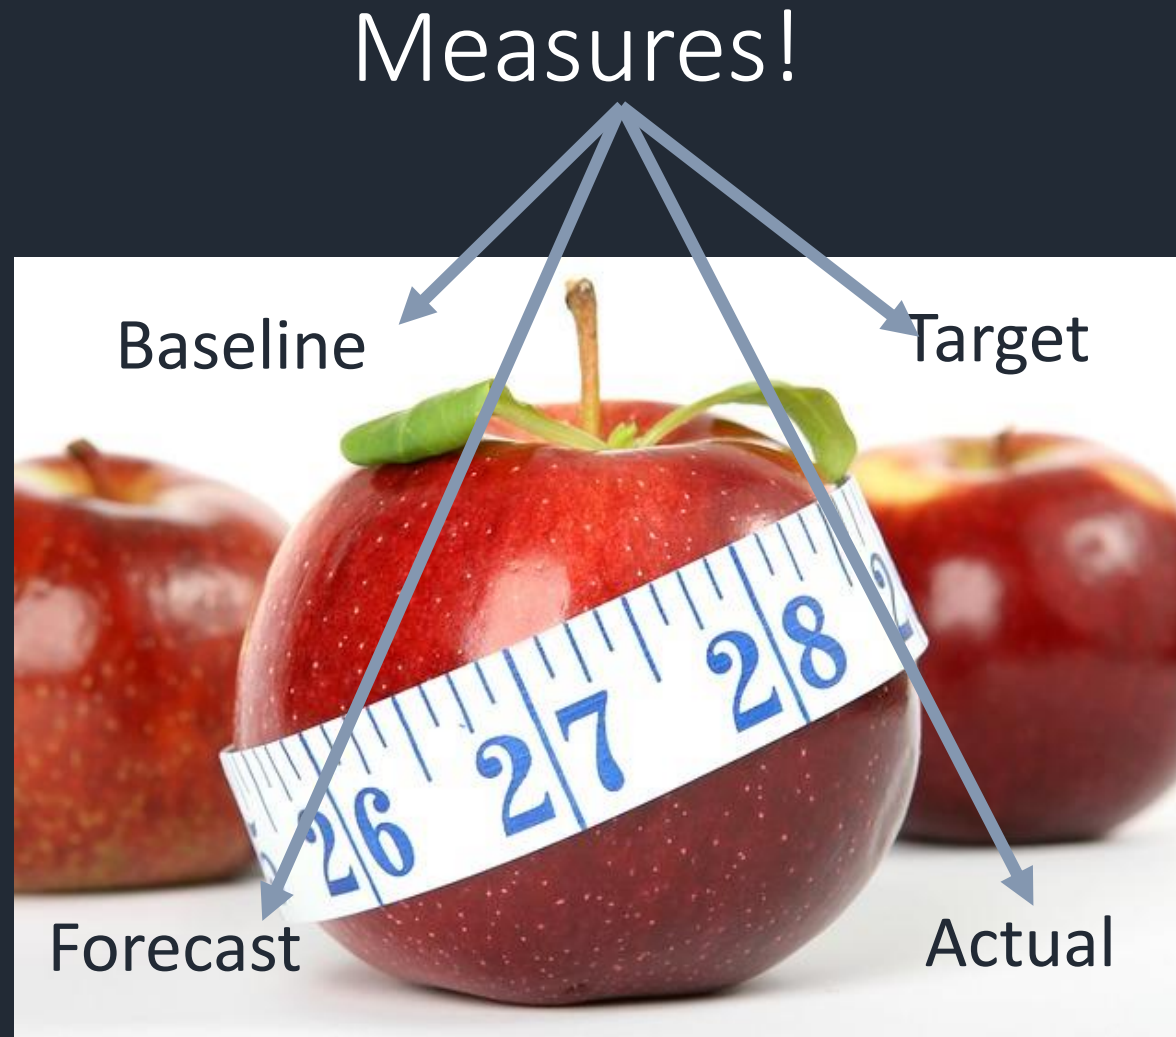

# Benefits Management Process

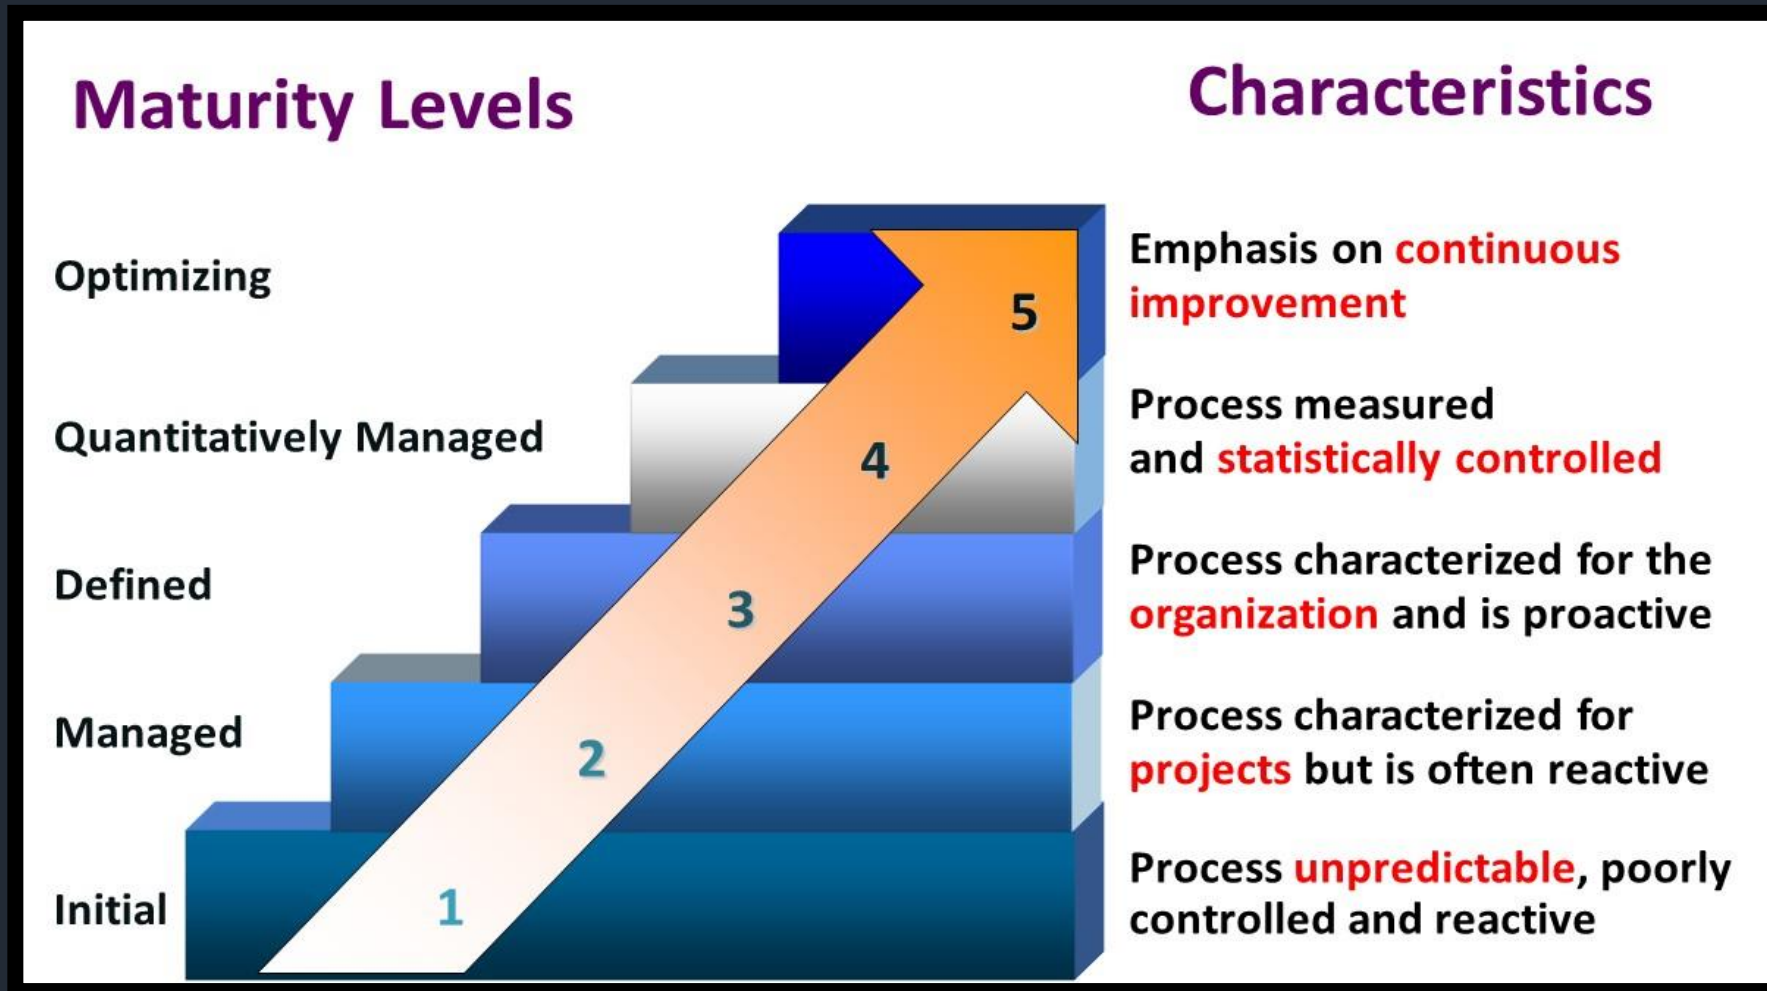

1. *What are the benefits?*
2. *What are they worth?*
3. *How do we realise them?*
4. *How are we doing?*
5. *What should we change?*

Benefit

When we identify benefits we invite and encourage the identification of disbenefits

Disbenefit

Disbenefits are the reasons our changes will underperform or even fail

We need to surface disbenefits as soon as possible so that we can eliminate or at least mitigate their impact

Disclose the change challenges

Implicate!

Given that decisions have to be made, and that we want to minimise chaos and succeed in change – consider the following:

Electric  
Vehicles

V

Petrol &  
Diesel

Coal or nuclear based power generation

V

Renewable energy

Chemical  
Fertiliser &  
Insecticides

V

Organic  
Fertiliser &  
Insecticides

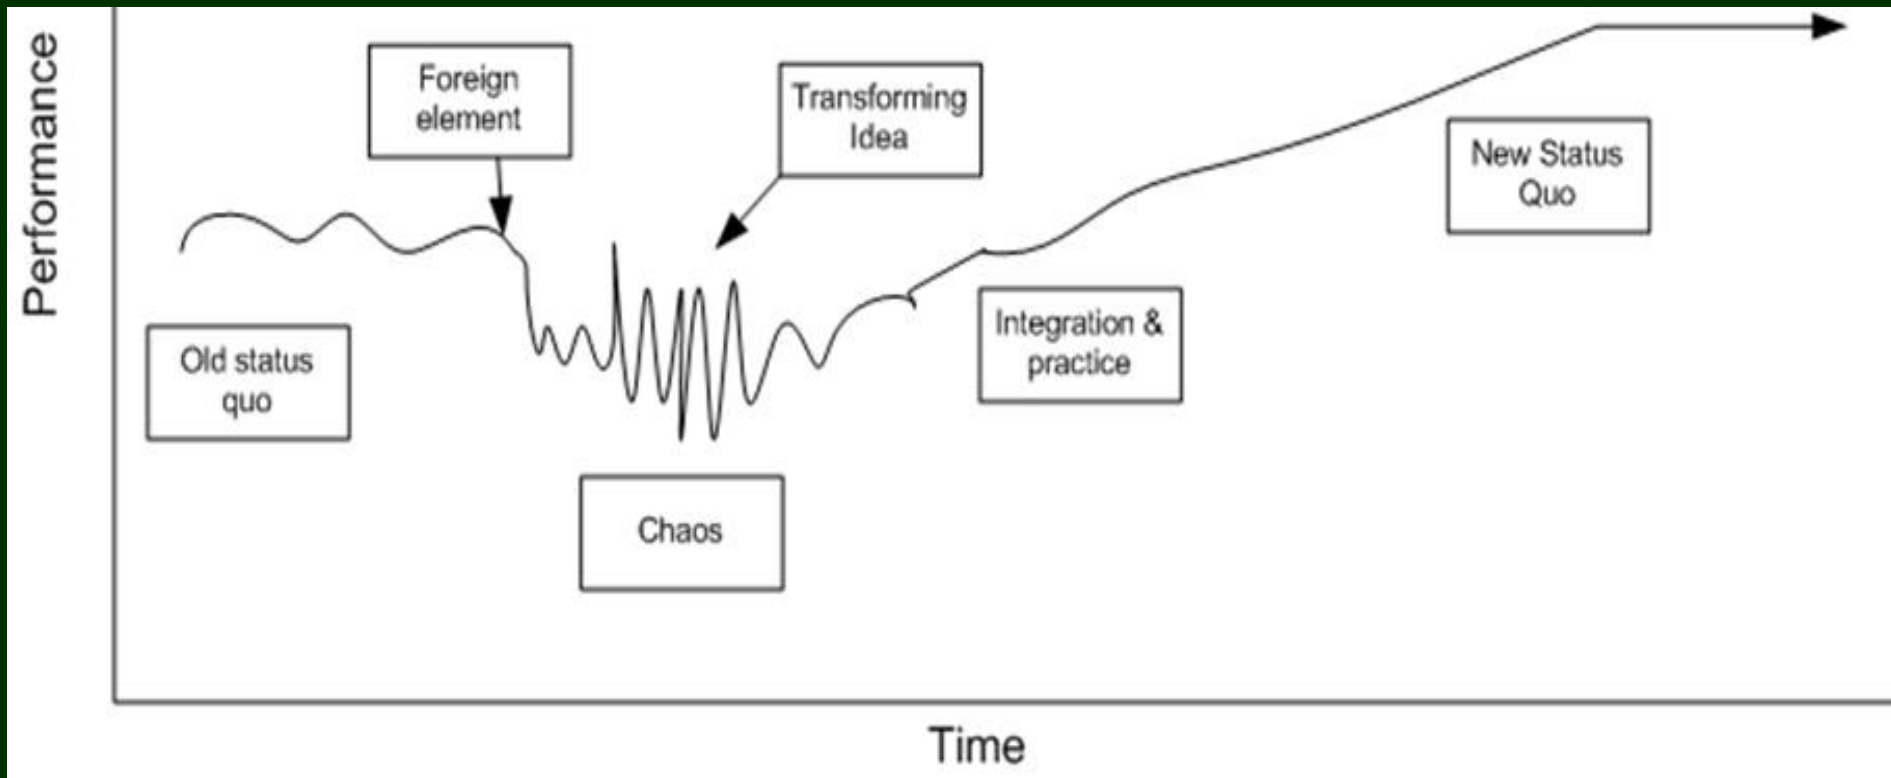

HS2

v

Northern  
Powerhouse

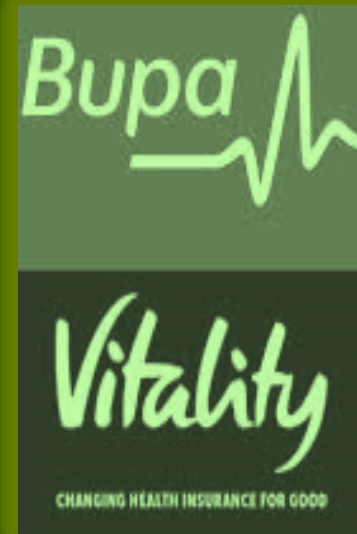

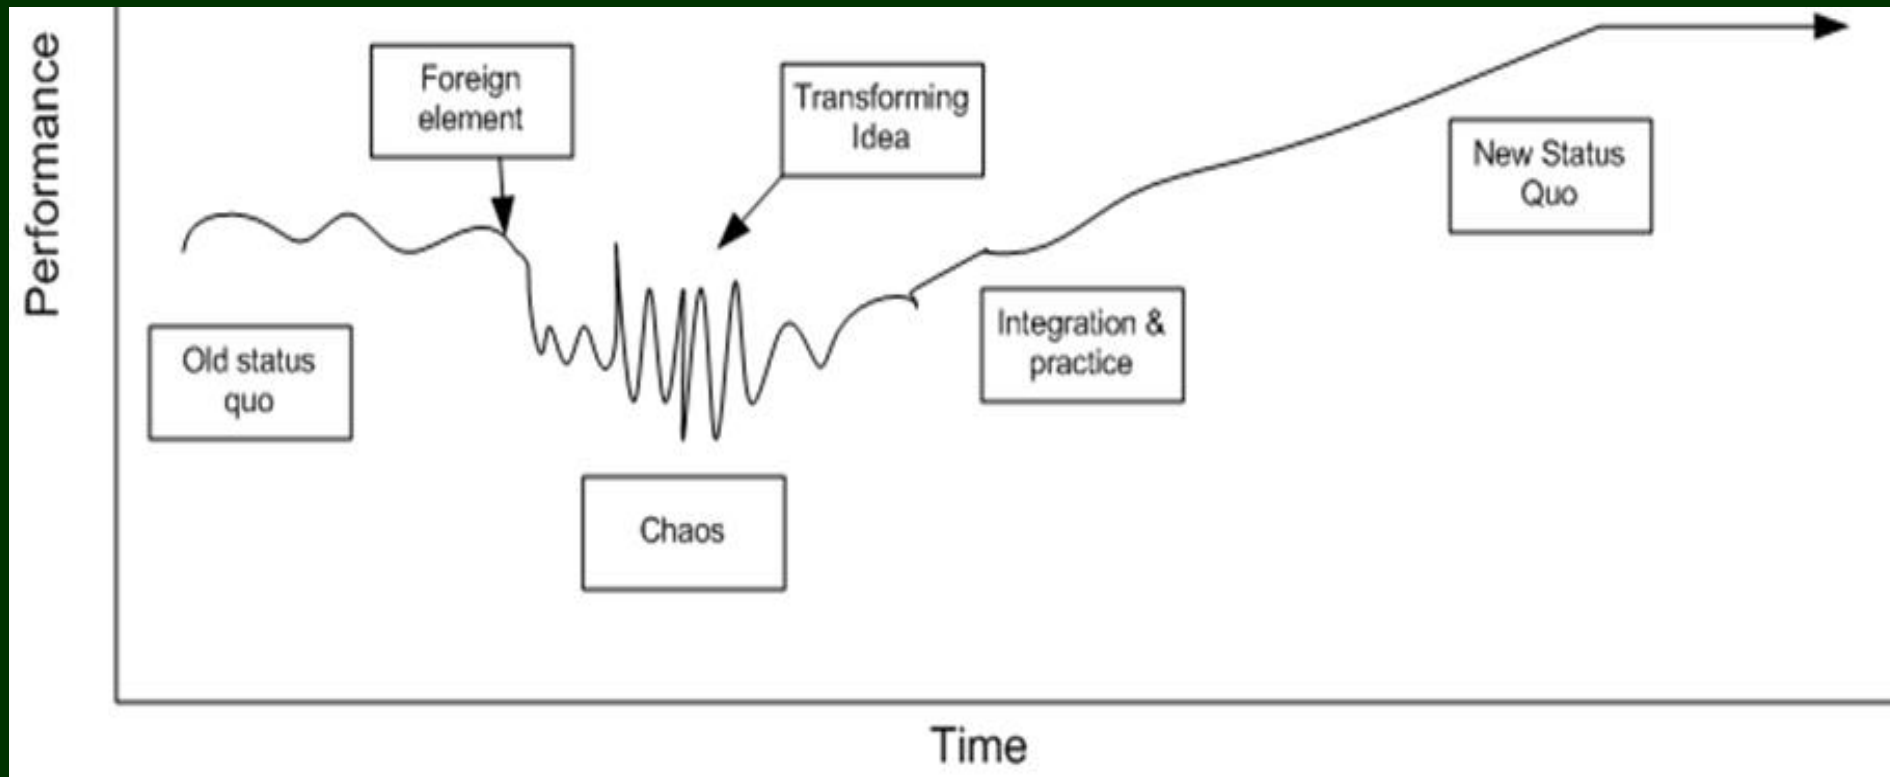

Public  
Funded NHS

**NHS**

v

Full or Partial  
Privately  
Funded NHS

Brown Field  
Site  
Development

v

Green Field  
Site  
Development

V

No easy answers to these but the

**BENEFITS**

must be reconciled with the

**DISBENEFITS (negative consequences)**

of the decisions and choices we make

**Benefits Management** principles and practices  
provide us with the means to do this.....
